THE AERONAUTICAL JOURNAL

OF THE ROYAL AERONAUTICAL SOCIETY

Volume CII

January–December 1998

Subject Index

AERODYNAMICS

A high order boundary element formulation for potential incompressible aerodynamics, M. Gennaretti, G. Calcagno, A Zamboni and L. Morino, pp 211-219.

A 2D Navier-Stokes method for unsteady compressible flow calculations on moving meshes, A.L. Gaitonde, D.P. Jones and S.P. Fiddes, pp 89-97.

Aerodynamics National Advisory Committee, p 392.

An experimental study of the idealised vortex system of a novel rotor blade tip, C.M. Copland, F.N. Coton and R.A.McD. Galbraith, pp 385-392.

An experimental study of the idealised vortex system of a novel rotor blade tip, C.A. Masson, R.B. Green, R.A.McD. Galbraith, and F.N. Coton, pp 451-457.

Application of the vortex breakdown phenomenon in the attenuation of trailing vortices, L.W. Traub, S. Mani, S.F. Galls and O.K. Rediniotos, pp 439-444.

Constrained, multipoint shape optimisation for complex 3D configurations, J. Elliott and J. Peraire, pp 365-376.

Development of unstructured dynamic grids for solving unsteady two-dimensional Euler equations, M.S. Kozic and D. Sredojevic, pp 195-200.

Identification of non-linear derivative models from Bo105 flight test data, M. Rohifs, pp 1-8.

Inverted-profile coaxial jet flows relevant to Astovl applications, K. Knowles and L. Kirkham, pp 377-384.

Inviscid and viscous simulation of spoiler performance, C. Xu, W.W.H. Yeung and R.W. Guo, pp 399-405.

On the equations of motion for an aircraft with an internal moving load which is then dropped, L. Bernstein, pp 9-24.

Shockwaves in the rotor world — a personal perspective of 30 years of rotor aerodynamic developments in the UK, P.G. Wilby, pp 113-128.

The dynamic induced velocity field of a model rotor in hover conditions, T.J. Ellenrieder and P.R. Brinson, pp 331-335.

The effect of skewing on the vorticity produced by an airjet vortex generator, A.A. Barberopoulos and K.P. Garry, pp 171-177.

The effect of trailing edge geometry on cavity flow oscillation driven by a supersonic shear layer, X. Zhang, A. Rona, J.A. Edwards, pp 129-136.

Unsteady propeller flows due to turbulence ingestion, J.M. Harden and M.V. Lowson, pp 63-70.

Vortical flow structures at a helicopter rotor model measured by LDV and PIV, M. Raffel, U. Seelhorst and C. Willert, pp 221-227.

AVIONICS

The feasibility and benefits of dynamic reconfiguration in integrated modular avionics, D.M. Johnson and T.A. Omiecinski, pp 99-105.

BOOK REVIEWS — BY AUTHOR

COMMUNICATIONS

Multi-sensor data fusion in defence and aerospace, C.J. Harris, A. Bailey and T.J. Dodd, pp 229-244.

COMPOSITES

Experimental and numerical failure analysis of bolted joints in CFRP woven laminates, N. Andréasson, C.P. Mackinlay and C. Soutis, pp 445-450.
Innovative approaches to composite structures, K.D. Potter, M.R. Wisnom, M.V. Lowson and R.D. Adams, pp 107-111.
The influences on optimal structural designs of the modelling processes and design concepts. Part II: All composite, rib wing design concepts, P.T. Anastasiadis, A.J. Morris, J.R.E.M. Hornlein and J. Krammer, pp 137-150.
Through thickness fatigue failure of fibre-reinforced composites, M.R. Wisnom and M.I. Jones, pp 83-88.

COMPUTATIONAL FLUID DYNAMICS

A high order boundary element formulation for potential incompressible aerodynamics, M. Gennaretti, G. Calcagno, A. Zamboni and L. Morino, pp 211-219.
A 2D Navier-Stokes method for unsteady compressible flow calculations on moving meshes, A.L. Gaitonde, D.P. Jones and S.P. Fiddes, pp 89-97.
Computation, analysis and theory of two-phase flows, A. Guha, pp 71-82.
Constrained, multipoint shape optimisation for complex 3D configurations, J. Elliott and J. Peraire, pp 365-376.
Development of unstructured dynamic grids for solving unsteady two-dimensional Euler equations, M.S. Kozic and D. Sredojevic, pp 195-200.
Inviscid and viscous simulation of spoiler performance, C. Xu, W.W.H. Yeung and R.W. Guo, pp 399-405.

DRAG

Constrained, multipoint shape optimisation for complex 3D configurations, J. Elliott and J. Peraire, pp 365-376.

DYNAMICS

A generic control anticipation parameter for aircraft handling qualities evaluation, J.E. Gautrey and M.V. Cook, pp 151-159.

Active control to augment rotor lead-lag damping, C. Kessler and G. Reichert, pp 245-258.

Identification of non-linear derivative models from Bo105 flight test data, M. Rohifs, pp 1-8.

On the equations of motion for an aircraft with an internal moving load which is then dropped, L. Bernstein, pp 9-24.

Non-linear flight dynamics at high angles-of-attack, P. Gránásy, C.B. Sørenson, E. Mosekilde and P.G. Thomasson, pp 337-343.

Stability analysis for inverse simulation of aircraft, K.M. Yip and G. Leng, pp 345-350.

The making of helicopter flying qualities: a requirements perspective, G.D. Padfield, pp 409-437.

Two new techniques for aircraft parameter estimation using neural networks, S.C. Raisinghani, A.K. Ghosh and P.K. Kaira, pp 25-30.

FATIGUE

Through thickness fatigue failure of fibre-reinforced composites, M.R. Wisnom and M.I. Jones, pp 83-88.

FLUID MECHANICS

Combined effect of wall suction and riblets on a low R_θ turbulent boundary layer, L. Djenidi, R.A. Antonia, J. Hundseid and P.A. Krogstad, pp 53-57.

Computation, analysis and theory of two-phase flows, A. Guha, pp 71-82.

Effect of cut-outs on underexpanded rectangular jets, S. Elangovan and E. Rathakrishnan, pp 267-275.

Heat transfer in a radially rotating smooth-walled tube, W.D. Morris and S.W. Chang, pp 277-285.

INTERNAL FLOW

Heat transfer in a radially rotating smooth-walled tube, W.D. Morris and S.W. Chang, pp 277-285.

PROPULSION

Experiments on cruise jet propulsion with a hydrogen scramjet, R.J. Stalker and A. Paull, pp 37-42.

Studies into hail ingestion of turbofan engines using a rotating fan and spinner assembly, H. Pan and P.M. Render, pp 45-51.

Unsteady propeller flows due to turbulence ingestion, J.M. Harden and M.V. Lowson, pp 63-70.

Variable cycle jet engines for a Mach 2·7 supersonic civil transport, L. Aleid and P. Pilidis, pp 31-36.

Whole assembly flutter analysis of a low-pressure turbine blade, A.I. Sayma, M. Vahdati, J.S. Green and M. Imregun, pp 459-463.

SAFETY

AASK — aircraft accident statistics and knowledge: a database of human experience in evacuation, derived from aviation accident reports, M. Owen, E.R. Galea, P.J. Lawrence and L. Filippidis, pp 353-363.

Application of the vortex breakdown phenomenon in the attenuation of trailing vortices, L.W. Traub, S. Mani, S.F. Galls and O.K. Rediniotos, pp 439-444.

Studies into hail ingestion of turbofan engines using a rotating fan and spinner assembly, H. Pan and P.M. Render, pp 45-51.

The numerical simulation of aircraft evacuation and its application to aircraft design and certification, M. Owen, E.R. Galea, P.J. Lawrence and L. Filippidis, pp 301-312.

SPACE

Satellite attitude slew manoeuvres using inverse control, C.R. McInnes, pp 259-265.

STRUCTURES

Experimental and numerical failure analysis of bolted joints in CFRP woven laminates, N. Andréasson, C.P. Mackinlay and C. Soutis, pp 445-450.

Innovative approaches to composite structures, K.D. Potter, M.R. Wisnom, M.V. Lowson and R.D. Adams, pp107-111.

The influences on optimal structural designs of the modelling processes and design concepts, Part II: All composite, rib wing design concepts, P.T. Anastasiadis, A.J. Morris, J.R.E.M. Hornlein and J. Krammer, pp 137-150.

Transport aircraft — a challenge for aluminium alloys for the 21st century, J.A. Jupp and H.J. Price, pp 181-188.

TESTING FACILITIES AND TECHNIQUES

A facility for simultaneous particle velocimetry and high resolution unsteady pressure measurement, D. Hurst, R.A.McD. Galbraith, F.N. Coton and I. Grant, pp 201-209.

A robust controller design for supersonic intermittent blowdown-type windtunnels, D-S. Hwang and P-L. Hsu, pp 161-169.

A thin film sensor for the measurement of unsteady pressure, R.J. Minniti, C.J. Sullivan and T.J. Mueller, pp 393-398.

Analysis of radiometric, lifetime and fluorescent lifetime imaging for pressure sensitive paint, J.W. Holmes, pp 189-194.

Realisation of the full potential of the laser doppler anemometer in the analysis of complex flows, R.V. Barrett and C. Swales, pp 313-320.

Two new techniques for aircraft parameter estimation using neural networks, S.C. Raisinghani, A.K. Ghosh and P.K. Kaira, pp 25-30.

VIBRATION

A review of current analysis capabilities applicable to the high frequency vibration prediction of aerospace structures, R.S. Langley and N.S. Bardell, pp 287-297.

An improved method for parameter selection in finite element model updating, M.J. Ratcliffe and N.A.J. Lieven, pp 321-329.

Whole assembly flutter analysis of a low-pressure turbine blade, A.I. Sayma, M. Vahdati, J.S. Green and M. Imregun, pp 459-463.

V/STOL

Active control to augment rotor lead-lag damping, C. Kessler and G. Reichert, pp 245-258.

An experimental study of the idealised vortex system of a novel rotor blade tip, C.M. Copland, F.N. Coton and R.A.McD. Galbraith, pp 385-392.

An experimental study of the idealised vortex system of a novel rotor blade tip, C.A. Masson, R.B. Green, R.A.McD. Galbraith, and F.N. Coton, pp 451-457.

Identification of non-linear derivative models from Bo105 flight test data, M. Rohifs, pp 1-8.

Inverted-profile coaxial jet flows relevant to Astovl applications, K. Knowles and L. Kirkham, pp 377-384.

Shockwaves in the rotor world — a personal perspective of 30 years of rotor aerodynamic developments in the UK, P.G. Wilby, pp 113-128.

The dynamic induced velocity field of a model rotor in hover conditions, T.J. Ellenrieder and P.R. Brinson, pp 331-335.

The making of helicopter flying qualities: a requirements perspective, G.D. Padfield, pp 409-437.

Vortical flow structures at a helicopter rotor model measured by LDV and PIV, M. Raffel, U. Seelhorst and C. Willert, pp 221-227.

Author Index

ADAMS, R.D., POTTER, K.D., WISNOM, M.R. and LOWSON, M.V.
Innovative approaches to composite structures, pp107-111.

ALEID, L. AND PILIDIS, P.
Variable cycle jet engines for a Mach 2·7 supersonic civil transport, pp 31-36.

ANASTASIADIS, P.T., MORRIS, A.J., HORNLEIN, J.R.E.M. and KRAMMER, J.
The influences on optimal structural designs of the modelling processes and design concepts, Part II: All composite, rib wing design concepts, pp 137-150.

ANDRÉASSON, N., MACKINLAY, C.P. and SOUTIS, C.
Experimental and numerical failure analysis of bolted joints in CFRP woven laminates, pp 445-450.

ANTONIA, R.A., DJENIDI, L., HUNDSEID, J. and KROGSTAD, P.A.
Combined effect of wall suction and riblets on a low R_θ turbulent boundary layer, pp 53-57.

BAILEY, A., HARRIS, C.J. and DODD, T.J.
Multi-sensor data fusion in defence and aerospace, pp 229-244.

BARBEROPOULOS, A.A. and GARRY, K.P.
The effect of skewing on the vorticity produced by an airjet vortex generator, pp 171-177.

BARDELL, N.S. and LANGLEY, R.S.
A review of current analysis capabilities applicable to the high frequency vibration prediction of aerospace structures, pp 287-297.

BARRETT, R.V. and SWALES, C.
Realisation of the full potential of the laser doppler anemometer in the analysis of complex flows, pp 313-320.

BERNSTEIN, L.
On the equations of motion for an aircraft with an internal moving load which is then dropped, pp 9-24.

BRINSON, P.R. and ELLENRIEDER, T.J.
The dynamic induced velocity field of a model rotor in hover conditions, pp 331-335.

CALCAGNO, G., GENNARETTI, M., ZAMBONI, A. and MORINO, L.
A high order boundary element formulation for potential incompressible aerodynamics, pp 211-219.

CHANG, S.W. and MORRIS, W.D
Heat transfer in a radially rotating smooth-walled tube, pp 277-285.

COOK, M.V. and GAUTREY, J.E.
A generic control anticipation parameter for aircraft handling qualities evaluation, pp 151-159.

COPLAND, C.M., COTON, F.N. and GALBRAITH, R.A.McD.
An experimental study of the idealised vortex system of a novel rotor blade tip, pp 385-392.

COTON, F.N., COPLAND, C.M. and GALBRAITH, R.A.McD.
An experimental study of the idealised vortex system of a novel rotor blade tip, pp 385-392.

COTON, F.N., HURST, D., GALBRAITH, R.A.McD. and GRANT, I.
A facility for simultaneous particle velocimetry and high resolution unsteady pressure measurement, pp 201-209.

COTON, F.N., MASSON, C.A., GREEN, R.B. and GALBRAITH, R.A.McD.
An experimental study of the idealised vortex system of a novel rotor blade tip, pp 451-457.

DJENIDI, L., ANTONIA, R.A., HUNDSEID, J. and KROGSTAD, P.A.
Combined effect of wall suction and riblets on a low R_θ turbulent boundary layer, pp 53-57.

DODD, T.J., HARRIS, C.J. and BAILEY, A.
Multi-sensor data fusion in defence and aerospace, pp 229-244.

EDWARDS, J.A., ZHANG, X. and RONA, A.
The effect of trailing edge geometry on cavity flow oscillation driven by a supersonic shear layer, pp 129-136.

ELANGOVAN, S. and RATHAKRISHNAN, E.
Effect of cut-outs on underexpanded rectangular jets, pp 267-275.

ELLENRIEDER, T.J. and BRINSON, P.R.
The dynamic induced velocity field of a model rotor in hover conditions, pp 331-335.

ELLIOTT, J. and PERAIRE, J.
Constrained, multipoint shape optimisation for complex 3D configurations, pp 365-376.

FIDDES, S.P., GAITONDE, A.L. and JONES, D.P.
A 2D Navier-Stokes method for unsteady compressible flow calculations on moving meshes, pp 89-97.

FILIPPIDIS, L., OWEN, M., GALEA, E.R. and LAWRENCE, P.J.
AASK — aircraft accident statistics and knowledge: a database of human experience in evacuation, derived from aviation accident reports, pp 353-363.

The numerical simulation of aircraft evacuation and its application to aircraft design and certification, pp 301-312.

GAITONDE, A.L., JONES, D.P. and FIDDES, S.P.
A 2D Navier-Stokes method for unsteady compressible flow calculations on moving meshes, pp 89-97.

GALBRAITH, R.A.McD., COPLAND, C.M. and COTON, F.N.
An experimental study of the idealised vortex system of a novel rotor blade tip, pp 385-392.

GALBRAITH, R.A.McD., HURST, D., COTON, F.N. and GRANT, I.
A facility for simultaneous particle velocimetry and high resolution unsteady pressure measurement, pp 201-209.

GALBRAITH, R.A.McD., MASSON, C.A., GREEN, R.B. and COTON, F.N.
An experimental study of the idealised vortex system of a novel rotor blade tip, pp 451-457.

GALEA, E.R., OWEN, M., LAWRENCE, P.J. and FILIPPIDIS, L.
AASK — aircraft accident statistics and knowledge: a database of human experience in evacuation, derived from aviation accident reports, pp 353-363.

The numerical simulation of aircraft evacuation and its application to aircraft design and certification, pp 301-312.

GALLS, S.F., TRAUB, L.W., MANI, S. and REDINIOTIS, O.K.
Application of the vortex breakdown phenomenon in the attenuation of trailing vortices, pp 439-444.

GARRY, K.P. and BARBEROPOULOS, A.A.
The effect of skewing on the vorticity produced by an airjet vortex generator, pp 171-177.

GAUTREY, J.E. and COOK, M.V.
A generic control anticipation parameter for aircraft handling qualities evaluation, pp 151-159.

GENNARETTI, M., CALCAGNO, G., ZAMBONI, A. and MORINO, L.
A high order boundary element formulation for potential incompressible aerodynamics, pp 211-219.

GHOSH, A.K., RAISINGHANI, S.C. and KAIRA, P.K.
Two new techniques for aircraft parameter estimation using neural networks, pp 25-30.

GRÁNÁSY, P., SØRENSON, C.B., MOSEKILDE, E. and THOMASSON, P.G.
Non-linear flight mechanics at high angles-of-attack, pp 337-343.

GRANT, I., HURST, D., GALBRAITH, R.A.McD. and COTON, F.N.
A facility for simultaneous particle velocimetry and high resolution unsteady pressure measurement, pp 201-209.

GREEN J.S., SAYMA, A.I., VAHDATI, M. and IMREGUN, M.
Whole assembly flutter analysis of a low-pressure turbine blade, pp 459-463.

GREEN, R.B., MASSON, C.A., GALBRAITH, R.A.McD. and COTON, F.N.
An experimental study of the idealised vortex system of a novel rotor blade tip, pp 451-457.

GUHA, A.
Computation, analysis and theory of two-phase flows, A. Guha, pp 71-82.

GUO, R.W., XU, C. and YEUNG, W.W.H.
Inviscid and viscous simulation of spoiler performance, pp 399-405.

HARDEN, J.M. and LOWSON, M.V.
Unsteady propeller flows due to turbulence ingestion, pp 63-70.

HARRIS, C.J., BAILEY, A. and DODD, T.J.
Multi-sensor data fusion in defence and aerospace, pp 229-244.

HOLMES, J.W.
Analysis of radiometric, lifetime and fluorescent lifetime imaging for pressure sensitive paint, pp 189-194.

HORNLEIN, J.R.E.M., ANASTASIADIS, P.T., MORRIS, A.J. and KRAMMER, J.
The influences on optimal structural designs of the modelling processes and design concepts, Part II: All composite, rib wing design concepts, pp 137-150.

HSU, P-L. and HWANG, D-S.
A robust controller design for supersonic intermittent blowdown-type windtunnels, pp 161-169.

HUNDSEID, J., DJENIDI, L., ANTONIA, R.A. and KROGSTAD, P.A.
Combined effect of wall suction and riblets on a low R_θ turbulent boundary layer, pp 53-57.

HURST, D., GALBRAITH, R.A.McD., COTON, F.N. and GRANT, I.
A facility for simultaneous particle velocimetry and high resolution unsteady pressure measurement, pp 201-209.

HWANG, D-S. and HSU, P-L.
A robust controller design for supersonic intermittent blowdown-type windtunnels, pp 161-169.

IMREGUN, M., SAYMA, A.I., VAHDATI, M. and GREEN J.S.
Whole assembly flutter analysis of a low-pressure turbine blade, pp 459-463.

JOHNSON, D.M. and OMIECINSKI, T.A.
The feasibility and benefits of dynamic reconfiguration in integrated modular avionics, pp 99-105.

JONES, D.P., GAITONDE, A.L. and FIDDES, S.P.
A 2D Navier-Stokes method for unsteady compressible flow calculations on moving meshes, pp 89-97.

JONES, M.I. and WISNOM, M.R.
Through thickness fatigue failure of fibre-reinforced composites, pp 83-88.

JUPP, J.A. and PRICE, H.J.
Transport aircraft — a challenge for aluminium alloys for the 21st century, pp 181-188.

KAIRA, P.K., RAISINGHANI, S.C. and GHOSH, A.K.
Two new techniques for aircraft parameter estimation using neural networks, pp 25-30.

KESSLER, C. and REICHERT, G.
Active control to augment rotor lead-lag damping, pp 245-258.

KIRKHAM, L. and KNOWLES, K.
Inverted-profile coaxial jet flows relevant to Astovl applications, pp 377-384.

KNOWLES, K. and KIRKHAM, L.
Inverted-profile coaxial jet flows relevant to Astovl applications, pp 377-384.

KOZIC, M.S. and SREDOJEVIC, D.
Development of unstructured dynamic grids for solving unsteady two-dimensional Euler equations, pp 195-200.

KRAMMER, J., ANASTASIADIS, P.T., MORRIS, A.J. and HORNLEIN, J.R.E.M.
The influences on optimal structural designs of the modelling processes and design concepts, Part II: All composite, rib wing design concepts, pp 137-150.

KROGSTAD, P.A., DJENIDI, L., ANTONIA, R.A. and HUNDSEID, J.
Combined effect of wall suction and riblets on a low R_θ turbulent boundary layer, pp 53-57.

LANGLEY, R.S. and BARDELL, N.S.
A review of current analysis capabilities applicable to the high frequency vibration prediction of aerospace structures, pp 287-297.

LAWRENCE, P.J., OWEN, M., GALEA, E.R. and FILIPPIDIS, L.
AASK — aircraft accident statistics and knowledge: a database of human experience in evacuation, derived from aviation accident reports, pp 353-363.

The numerical simulation of aircraft evacuation and its application to aircraft design and certification, pp 301-312.

LENG, G. and YIP, K.M.
Stability analysis for inverse simulation of aircraft, pp 345-350.

LIEVEN, N.A.J. and RATCLIFFE, M.J.
An improved method for parameter selection in finite element model updating, pp 321-329.

LOWSON, M.V. and HARDEN, J.M.
Unsteady propeller flows due to turbulence ingestion, pp 63-70.

LOWSON, M.V., POTTER, K.D., WISNOM, M.R. and ADAMS, R.D.
Innovative approaches to composite structures, pp 107-111.

McINNES, C.R.
Satellite attitude slew manoeuvres using inverse control, pp 259-265.

MACKINLAY, C.P., ANDRÉASSON, N. and SOUTIS, C.
Experimental and numerical failure analysis of bolted joints in CFRP woven laminates, pp 445-450.

MANI, S., TRAUB, L.W., GALLS, S.F. and REDINIOTIS, O.K.
Application of the vortex breakdown phenomenon in the attenuation of trailing vortices, pp 439-444.

MASSON, C.A., GREEN, R.B., GALBRAITH, R.A.McD. and COTON, F.N.
An experimental study of the idealised vortex system of a novel rotor blade tip, pp 451-457.

MINNITI, R.J., SULLIVAN, C.J. and MUELLER, T.J.
A thin film sensor for the measurement of unsteady pressure, pp 393-398.

MORINO, L., GENNARETTI, M., CALCAGNO, G. and ZAMBONI, A.
A high order boundary element formulation for potential incompressible aerodynamics, pp 211-219.

MORRIS, A.J., ANASTASIADIS, P.T., HORNLEIN, J.R.E.M. and KRAMMER, J.
The influences on optimal structural designs of the modelling processes and design concepts, Part II: All composite, rib wing design concepts, pp 137-150.

MORRIS, W.D. and CHANG, S.W.
Heat transfer in a radially rotating smooth-walled tube, pp 277-285.

MOSEKILDE, E., GRÁNÁSY, P., SØRENSON, C.B. and THOMASSON, P.G.
Non-linear flight mechanics at high angles-of-attack, pp 337-343.

MUELLER, T.J., MINNITI, R.J. and SULLIVAN, C.J.
A thin film sensor for the measurement of unsteady pressure, pp 393-398.

OMIECINSKI, T.A. and JOHNSON, D.M.
The feasibility and benefits of dynamic reconfiguration in integrated modular avionics, pp 99-105.

OWEN, M., GALEA, E.R., LAWRENCE, P.J. and FILIPPIDIS, L.
AASK — aircraft accident statistics and knowledge: a database of human experience in evacuation, derived from aviation accident reports, pp 353-363.

The numerical simulation of aircraft evacuation and its application to aircraft design and certification, pp 301-312.

PADFIELD, G.D.
The making of helicopter flying qualities: a requirements perspective, pp 409-437.

PAN, H. AND RENDER, P.M.
Studies into hail ingestion of turbofan engines using a rotating fan and spinner assembly, pp 45-51.

PAULL, A. and STALKER, R.J.
Experiments on cruise jet propulsion with a hydrogen scramjet, pp 37-42.

PERAIRE, J. and ELLIOTT, J.
Constrained, multipoint shape optimisation for complex 3D configurations, pp 365-376.

PILIDIS, P. AND ALEID, L.
Variable cycle jet engines for a Mach 2·7 supersonic civil transport, pp 31-36.

POTTER, K.D., WISNOM, M.R., LOWSON, M.V. and ADAMS, R.D.
Innovative approaches to composite structures, pp 107-111.

PRICE, H.J. and JUPP, J.A.
Transport aircraft — a challenge for aluminium alloys for the 21st century, pp 181-188.

RAFFEL, M., SEELHORST, U. and WILLERT, C.
Vortical flow structures at a helicopter rotor model measured by LDV and PIV, pp 221-227.

RAISINGHANI, S.C., GHOSH, A.K. and KAIRA, P.K.
Two new techniques for aircraft parameter estimation using neural networks, pp 25-30.

RATCLIFFE, M.J. and LIEVEN, N.A.J.
An improved method for parameter selection in finite element model updating, pp 321-329.

RATHAKRISHNAN, E. and ELANGOVAN, S.
Effect of cut-outs on underexpanded rectangular jets, pp 267-275.

REDINIOTIS, O.K., TRAUB, L.W., MANI, S. and GALLS, S.F.
Application of the vortex breakdown phenomenon in the attenuation of trailing vortices, pp 439-444.

REICHERT, G. and KESSLER, C.
Active control to augment rotor lead-lag damping, pp 245-258.

RENDER, P.M. and PAN, H.
Studies into hail ingestion of turbofan engines using a rotating fan and spinner assembly, pp 45-51.

ROHIFS, M.
Identification of non-linear derivative models from Bo105 flight test data, pp 1-8.

RONA, A., ZHANG, X. and EDWARDS, J.A.
The effect of trailing edge geometry on cavity flow oscillation driven by a supersonic shear layer, pp 129-136.

SAYMA, A.I., VAHDATI, M., GREEN J.S. and IMREGUN, M.
Whole assembly flutter analysis of a low-pressure turbine blade, pp 459-463.

SEELHORST, U., RAFFEL, M. and WILLERT, C.
Vortical flow structures at a helicopter rotor model measured by LDV and PIV, pp 221-227.

SØRENSON, C.B., GRÁNÁSY, P., MOSEKILDE, E. and THOMASSON, P.G.
Non-linear flight mechanics at high angles-of-attack, pp 337-343.

SOUTIS, C., ANDRÉASSON, N. and MACKINLAY, C.P.
Experimental and numerical failure analysis of bolted joints in CFRP woven laminates, pp 445-450.

SREDOJEVIC, D. and KOZIC, M.S.
Development of unstructured dynamic grids for solving unsteady two-dimensional Euler equations, pp 195-200.

STALKER, R.J. and PAULL, A.
Experiments on cruise jet propulsion with a hydrogen scramjet, pp 37-42.

SULLIVAN, C.J., MINNITI, R.J. and MUELLER, T.J.
A thin film sensor for the measurement of unsteady pressure, pp 393-398.

SWALES, C. and BARRETT, R.V.
Realisation of the full potential of the laser doppler anemometer in the analysis of complex flows, pp 313-320.

THOMASSON, P.G., GRÁNÁSY, P., SØRENSON, C.B. and MOSEKILDE, E.
Non-linear flight mechanics at high angles-of-attack, pp 337-343.

TRAUB, L.W., MANI, S., GALLS, S.F. and REDINIOTIS, O.K.
Application of the vortex breakdown phenomenon in the attenuation of trailing vortices, pp 439-444.

VAHDATI, M., SAYMA, A.I., GREEN J.S. and IMREGUN, M.
Whole assembly flutter analysis of a low-pressure turbine blade, pp 459-463.

WILBY, P.G.
Shockwaves in the rotor world — a personal perspective of 30 years of rotor aerodynamic developments in the UK, pp 113-128.

WILLERT, C., RAFFEL, M. and SEELHORST, U.
Vortical flow structures at a helicopter rotor model measured by LDV and PIV, pp 221-227.

WISNOM, M.R. and JONES, M.I.
Through thickness fatigue failure of fibre-reinforced composites, pp 83-88.

WISNOM, M.R., POTTER, K.D., LOWSON, M.V. and ADAMS, R.D.
Innovative approaches to composite structures, pp 107-111.

XU, C., YEUNG, W.W.H. and GUO, R.W.
Inviscid and viscous simulation of spoiler performance, pp 399-405.

YEUNG, W.W.H., XU, C. and GUO, R.W.
Inviscid and viscous simulation of spoiler performance, pp 399-405.

YIP, K.M. and LENG, G.
Stability analysis for inverse simulation of aircraft, pp 345-350.

ZAMBONI, A., GENNARETTI, M., CALCAGNO, G. and MORINO, L.
A high order boundary element formulation for potential incompressible aerodynamics, pp 211-219.

ZHANG, X., RONA, A. and EDWARDS, J.A.
The effect of trailing edge geometry on cavity flow oscillation driven by a supersonic shear layer, pp 129-136.

Volume CII

Number 1011	January	1-59
Number 1012	February	61-111
Number 1013	March	113-179
Number 1014	April	181-227
Number 1015	May	229-299
Number 1016	June/July	301-351
Number 1017	August/September	353-407
Number 1018	October-December	409-463

The editorial staff would like to thank all the referees who provided valuable comments throughout 1998. Those who assisted on papers which reached a conclusion in 1998 are listed below.

F.W. Armstrong
D.E.H. Balmford
J.R. Banerjee
R. Battoo
P.W. Bearman
L. Bernstein
T.S. Bowling
E. Brook
R.W. Bukowski
P. Bunnis
R. Butler
B. Caldwell
P. Christopher
N. Collings
M.V. Cook
R.K. Cooper
F.N. Coton
